

TECHNICAL DINNER MEETING: 6 November 2019

Introduction to Building Enclosure Commissioning

Presented by:

Clarissa Binkley, P.Eng., M.A.Sc., B.A.Sc
Principal, Morrison Hershfield

Course Synopsis:

The Commissioning process has historically attached itself to active systems, leaving passive envelope systems undefined and unchecked. Code changes are requiring designers and contractors to deliver higher performance from their buildings, especially from the building envelope. Understanding these Building Enclosure Commissioning (BECx) requirements will enable designers to prepare for these changes.

Learning Objectives:

1. Understand what building envelope commissioning entails - especially related to requirements in LEED v4 and LEED 4.1.
2. Understand the importance of documenting the building envelope performance requirements in the Owner's Project Requirements.
3. Examine the impact building envelope commissioning has on the energy performance of the facility.
4. Learn how to select performance requirements appropriate for building envelope commissioning.

Meet your Presenter:

Clarissa Binkley is a Principal and Building Science Consultant at Morrison Hershfield (MH), specializing in new construction, building enclosure commissioning, and façade design. Prior to opening MH's Oakland office in 2017, Clarissa worked in two of their Canadian offices in Toronto and Edmonton.

Clarissa holds a B.A.Sc. and an M.A.Sc in Civil Engineering from the University of Toronto. She is a member of the Association of Professional Engineers and Geoscientists of Alberta (APEGA) and the California Board of Professional Engineers and Land Surveyors (PELS).
